## kid's education

Posted by hsmom - 2004/08/06 20:49

---

For those of you with kids, what is your goals for your children's education?

One goal for my kids is that they think for themselves, and do not need to be spoon fed their education.

My oldest son came up with these the other day. The sentence usually starts, Mom, why do they call it ...

Sundown, sunrise-He says the sun doesn't move, the earth does. It should be called earthdown and earthrise.

toothbrush-you don't brush one tooth, it should be called teethbrush.

Sunday, as a weekend day-Sunday is the beginning of the week. It should be called the weekstart day.

just had to share:laugh: :)

---

here is the one that still stumps me. I asked my dad why is it that we park on a driveway and drive on a parkway?

The goal for education for my kids is for them to ask questions and if something doesn't make sense ask up.

I want my youngest to have an independent life. I don't know what her outcomes will be but I can hope for teh best.

Those are so funny. Kids are incredible. They sat the most insightful things. When my daughter (now in her 4th year of college) was in elementary school, we were going to open house, as we arrived at the school and were greeted by the principal, she politely questioned "Why is this called OPEN HOUSE, it should be called OPEN SCHOOL! She's brilliant

I was a foster parent for 10 years, I could write a page on the funny things kids say, but I think it's already been done.  
You all take good care of yourselves.

---

welcome payenanny to the boards! Yes, your daughter is a genius!

About writing down all the things kids say, do it. It's neat to have a record, and to show the list to their kids, your

grandkids!!:)

Hi hsmom

You are sooooo right about writing the sweet and cute things our children say when they are young... I wrote in my children's books when they were infants like the first word or full sentence they said. My middle child who is now a first time mom has seen her book many times, and she too is writing everything special my grandsons says and when.

I still remember her first sentence "The doggy stepped in duh puddle" :laugh: :laugh: She thought it was the funniest thing she had ever seen..

She laughed for the longest time.

A memory is always a gift to your children and grandchildren :)

Just wait till I start showing my grandkids their parents school workbooks and art from the first year they started JK., through to report cards all the way through high school. :x :P :blink:

Sure my kids are not going to want the kiddies to see some of their old marks :P  
Hugs B)

Thank you hsmom for the warm welcome. I enjoy reading the posts from you and the "banditos" (Thats nothing like the " trifecta" is it? ) I don't have a computer at home, I'm at work when i visit. Sometimes I go to the local library to check in on the boards. I read the other board every day and when they closed for the summer I found this one. Although this is all relatively new for my novice computer self, I can absolutely "feel" the difference between the two boards and their clientele. This one has made me feel comfortable enough to interject an occasional thought or comment. Thank you for your kindness to me and to the universe. Enjoy today.

---

ok I have a couple of more sayings that my 4 and 5 year old do. My oldest who is when asked if she is sure will reply "I Am Sure!" then when you double checked she says "I Told You ANNIE Is Sure!"

My youngest can't say here I am so when you ask where she is sshe replies "Here Me Am!"

I thought everyone would enjoy those little tidbits.

---

:) :) :) That is too cute ;) She must be so smart and really does not like it when someone questions her thoughtout answers.

You must give your children a lot of quality time for her to be able to relay her thought so clearly...

Way to go hsmom a wonderful sign that you are doing a A+ job home schooling your children :)

Have a good evening

Hugs

Here are a couple of things to think about:  
Doesn't it seem crazy that you make amends,  
but not one amend?

If you have a bunch of odds and ends  
get rid if all but one of them'what do you call it?

Ship by truck and send cargo by ship?

Have noses that run and feet that smell?

How can a slim chance and a fat chance be the same,  
while a wise man and a wise guy are opposites?

You fill in a form by filling it out,an alarm goes off by going on!

What other lanuage do people recite at a play  
and play at a recital?

Quicksand is slow and boxing rings are square!

English is a crazy lanuage !!! ;)

I wasn't going to say anything, but, WHAT???

2cents, I got the chance to have my son sit down with me and read this thread. He was laughing out loud!! It's so neat to have a child old enough to reason and converse with, just not to. Thanks for the laugh:)

I protest :ohmy: :ohmy:

not nice to call someone on what they wrote in a fit of laughter :P :P :P :blink:

Like I am going to be able to tell you what I was thinking!!! or what the hang I meant by those letters put together :x :x

Until I saw the notice for this thread, I had even forgotten I wrote the DUMB THING :ohmy: There I admit I was loooooooooooooooooonieeeeeeeeeeeeeeeee that morning :laugh: :laugh:

But heck thanks for the reminder of a baddddddddd day :mad: :P :P

catch you on the flip side

Hugs

:laugh: :laugh:

## makes you wonder????

Posted by momof2gg24 - 2004/08/30 18:45

---

A new take on science class:

The 6th grade science teacher, Mrs. Parks, asked her class,"Which human body part increases to ten times its size when stimulated?"

No one answered until little Mary stood up, angry, and said, "You should not be asking sixth-graders a question like that! I'm going to tell my parents, and they will go and tell the principal, who will then fire you!" With a sneer on her face, she then sat back down.

Mrs. Parks ignored her and asked the question again,"Which body part increases to 10 times its size when stimulated?"

Little Mary's mouth fell open; then she said to those around her, "Boy, is she going to get in big trouble!"

The teacher continued to ignore her and said to the class, "Anybody?"

---

Finally, Billy stood up, looked around nervously, and said, "The body part that increases 10 times its size when stimulated is the pupil of the eye."

Mrs. Parks said, "Very good, Billy," then turned to Mary and continued,

"As for you, young lady, I have three things to say:

One, you have a dirty mind,

Two, you didn't read your homework,

and Three, one day you are going to be very, very disappointed." :blink: :unsure:

i had to share my best friend sent it to my i am still laughing :laugh: :P

Technically, the pupil shrinks when light hits it, and gets larger the darker the environment. But still funny!!!!

## kids

Posted by hsmom - 2004/09/17 20:17

---

No, they are the ones that move the stuff in the first place. Before the kids came along, I could leave something on the couch, and it would be there in the morning!!
