
More Natural "Cures" Revealed by Kevin Trudeau

Posted by mazzy - 2006/09/02 18:28

I'm reading this book with an open mind. Kevin Trudeau is a slick salesman, but a lot of what he says is hitting my common sense. I have a take it, or toss it attitude where controversial ideas are concerned. Interesting reading.

I heard that Trudeau served prison time for his part in a credit card scams.

And that the FTC fined him two million dollars for making fraudulent cancer cure claims?

I read about those claims on the internet, but I must say a lot of what he is saying is hitting my common sense... the rest I toss.

An interesting point he makes is that we are conditioned to treat the symptoms of an illness, and not the cause. If you treat the cause... you may be able to cure the illness.

Yeah, I usually respect advice that rings true and sensible. Other info I'm more guarded about! I think that there are so many things we can do on our own, but there are definitely times that an author is going for fame and fortune.

Kevin Trudeaus is a Charlotin...he has been heavily fined and put in prison for scamming people....In his book mentioned in this post...he leads people to believe that he knows how to cure cancer, heart disease and many other life threatening

diseases...but he offers no answers in his book...to supposedly receive these answers, one must go to his web site and pay to join.....still no answers on the web site.....he is currently being investigated by the US government once again for FRAUD!

This guy makes a sham out of everything he touches!!

I got his first book as an Audio Book. I find it quite interesting. Yes, he's a great marketer who is making a ton of money by getting people to sign up for his site but there is some truth to a lot of the stuff he talks about.

Curiosity hasn't gotten the best of me yet though...I haven't actually signed up for his site...lol

He is a great marketer... I wouldn't waste my time defending his reputation though... LOL... he seems defensive in his book about allegations made about him.

My daughter signed up for his site... not much more info... she has since cancelled.

I am checking out a lot of what he talks about re health issues and cures. He seems to be reporting about issues that are controversial, but throughout states it is his opinion. The good thing about the book for me is that it has made me aware of ingredients that may be making one sick.

Have you learned anything useful from his first book? Please share.

You all reminded me that I bought this book last December. I haven't read the whole thing..need to get it down off the bookshelf and open it again. I don't know about the curing cancer stuff, but I do know, I wouldn't pay to join anyone's website. If I remember correctly, a lot of his stuff made sense. Although, much of it was common sense...I did learn some things. So thanks for the reminder...I'll check it out again.

I had to do an internet search on him to find out who he was. At first I was thinking Gary Trudeau. When I saw his picture I immediately knew who it was. One hit I got was about him being banned from doing infomercials.

That's where I'd seen him before. At first on one product then another.. I automatically thought of him as a salesman only... trying to hawk a product.

The infomercials I saw involving him more often than not made it look like a talk show. So it could easily draw people into the topic..

I think one thing I saw him hawking was some sort of memory enhancing product.

Here is a link... it happens to be from a 'quackwatch' website!

I was skeptical with the things I saw on the infomercials. I didn't know he was an author too. No matter, I didn't lose a penny!

The format of the infomercial to me was a red flag.

I fell asleep with the television on last night and woke up to him promoting his book on tv this am. So he is not banned from doing infomercials in my neck of the woods.

I hit that same site KP!! And a couple of others that talked about his jail time and huge fines. I think it's so sad, because I'm sure there are some valid statements along with the bogus stuff.

I never bought any of his books, but I thought about it! I'm just doing a lot of medical/health research on sites that I trust.

I was flipping threw the channels right now and he's on tv here right now on channel 28 promoting his second book "MORE natural cures".

Obviously then he isn't 'really' banned. Maybe it's just another salesmanship if you call it something other than an infomercial. A loophole perhaps. Maybe he was banned in a particular state or by particular networks.

If I get more time later today... I'll try to find out. Maybe Debby has access to whatever legal wranglings involve him and how a ban can be enforced or skirted.

Sure and thanks KPW.... You know my boyfriend bought the first book and went and bought these pills for diabetic...

called diabetico (something like that) and they did absolutely nothing for him. His doctor at the time told him to stop using them cause they don't work and he was right, but he wanted to see for himself.

Re:More Natural

Posted by Nadia - 2006/11/08 11:39

He's got the book somewhere I should go and look for it.. it was all bogus.. somethings yes are interesting and in the back of your mind you think hey could this really work! but then when you go and try it... NOT.

Re:More Natural

Here's a link to wikipedia.. Good summation of his career, claims and problems.

The second link is a the third item referred to in the reference area.

http://en.wikipedia.org/wiki/Kevin_Trudeau

http://www.consumeraffairs.com/news04/trudeau_informercials.html

The wikipedia.. has everything you always wanted to know about Kevin Trudeau but were afraid to ask! :P :P

What a quack..

Although I will say that peroxide has a multitude of uses...and my father uses it to combat bacteria. He uses it as a mouthwash and gargle.. He has COPD and since he started using it..has had far fewer respiratory infections like bronchitis.

So there may be a few old wives tales thrown in that have some basis of truth and might work.

Good job KPW... LOL... I agree Kevin Trudeau seems to be a quack... a very rich one... by just the number of books he sold. LOL

What I got out of the book for me was awareness... how to read ingredient labels... the benefits of whole foods... the benefits of eating grass fed, antibiotic and hormone free meat... the danger of toxins and chemicals in food... the lack of nutrition in processed foods to name a few.

The book has lead me to research different foods, diets and nutrition in general. I'm finding it interesting. I'm taking the information in his book from who it comes, and doing further research on my own.
