
Rodent on the Early Show

Posted by Debby - 2007/04/26 18:37

This past week there was a rat that came out on camera while the host was conducting an interview on the Early Show (CBS). They kept going as if it wasn't there. David Letterman later played the clip and had a good laugh on his show.

I want to see it, but, I can't find the clip anywhere. I have googled it every way I can think of, but, can't locate the video on CBS or any of the other places like AOL.

Any suggestions? I know it sounds quite disgusting, but, I want to see it for some reason. LOL.
