
Saying hello from the Coaches Corner!

Posted by coacheva - 2007/12/22 02:08

Hi folks,

Great to be here in the community. I'm Eva Gregory, CPCC, master Law of Attraction coach, speaker and author of several programs and books including The Feel Good Guide to Prosperity. I've instructed tens of thousands in person, on the radio and in teleconferences, seminars and workshops on how to deliberately create a life by design using the Law of Attraction and am regularly featured on radio and in the media as a recognized authority on the Law of Attraction. As co-host of The Jeanna and Eva Show, in turn, I have interviewed some of the most powerfully successful inspirational experts today.

My unwavering belief is that we all have the power to change anything in our lives and design it purposefully. That's what clients come to me for.

I also certify coaches to become highly effective Law of Attraction coaches, which is something I dearly love doing!

My business background includes over 20 years in finance & operations and marketing with a Fortune 100 corporation; as marketing executive of a software start-up firm; and as owner of my own consulting firm.

The Leading Edge Living One Year Success Program is the cornerstone of my Leading Edge Success Club where I coach hundreds of clients worldwide. This is another one of my favorite things I do.

And I'm extremely excited about my new book, Life Lessons for Mastering the Law of Attraction, co-authored with Jack Canfield, Mark Victor Hanson and Jeanna Gabellini. You can look for it in bookstores in March of 2008.

My latest product launched today! It's my Attraction In Action Vision Board software program which allows you to create your own vision board right on your computer where your pictures, affirmations, power words (and coming soon, music and audio) play right on your computer screen as a screen saver.. It's pretty powerful.

Thanks so much Tara, for letting us coaches in the MSOC community know about your site! I look forward to connecting with all of you here!
