
t has made a great difference in my life

Posted by themanisme - 2008/02/05 20:46

Last year a friend of my mom had cataract surgery im my2020 and shared her story with us. She knew my vision was poor and I decided at that time that I was going to do this for myself. I could not drive at night and was feeling exhausted and not well.

When I came in for my evaluation in my2020, I watched all of the videos and felt a bit scared, but I just decided to have the surgery. I prayed about my decision and my friends at my church prayed for me.

The LASIK procedure was short and fast. Afterward I looked up and I looked around and I said, "WOW and thank you " to my doctor. I felt unbelievably great.

I can read everything and my vision is better than with glasses. I feel like I have new eyes and a new life.

I tell people that anyone who wants something better in life might be scared. My faith in God gave me strength. Nobody has to be scared. If you want this for yourself, just do it. It has made a great difference in my life.
